Setup your rooms

Config file: php/config/poll_config.php

```php
'Raum 1' => [
    // Andre
    'co2' => '6f11eaa0-260d-11eb-a5eb-73e0dd6f6423',
],
'Raum 2' => [
    // Justin
    'co2' => '84c96190-25f8-11eb-8265-d7d703fabc64',
],
```

Array key is used as label in Grafana / tag for measurements

Polling configuration

Config file: php/config/poll_config.php

```php
'influxdb_host' => 'localhost',
'influxdb_port' => '8086',
'poll_interval' => 30,
'poll_sleep_between_requests' => 2,
'verbose' => FALSE,
'delaying_start_seconds' => 10,
```

`delaying_start_seconds` can be helpful to not have supervisor terminate on first startup. use 0 or false to not delay start.

Debugging / Logs

```
docker ps
docker exec -it <container-id> bash
```
